

## Angel Party Hat/Decoration

Using a party hat (or make a cone out of a piece of card)

Mark out where you would like the pipe cleaner wings.

Using a hole punch (or some Blue Tak and a pencil) punch through a hole in the cone. Connect 4 pipe cleaners in the shape of wings together and insert the ends in the hole. Add some PVA glue (or hot glue gun) on the inside of the cone to help keep the wings in place. Use another pipe cleaner to thread through the top of the cone and position into a halo. Next, get a pomp-pom or Poly Bauble and place it at the top of the cone for the angel's head – decorate as needed or leave blank.

You can also make stars out of pieces of paper to stick on for more decoration or grab yourself some festive stickers.

To make this special, why not hole punch some holes in the cone and place a LED candle underneath and let the candle shine through.

The Angel hat becomes a decoration and a party piece for the festive season.

Alternatively, using a plain piece of card stick a sheet of felt over the top and make a felt angel, decorate using off cuts of felt or other fabric.

Another idea is to thread string through the top as well so that your angel can suspend from the ceiling for all to see. Use doilies to decorate the cone for a lace effect, or make the wings with tissue paper wrapped around the pipe cleaners for a stain glass effect.
