Button Art Xmas Tree

Items Needed:

Xmas tree template
Buttons (ART285)
Good Glue (PVA always works) PVAG/BPVAG

Something a little extra......
Rhinestone (XRL)
Pom poms (XTPP24)
Snowballs (XMS12)
Scissors – SOSRB/SOSLG

Method:

Print out our free downloadable tree template and draw around it on Green Card (ART230) or on Glitter Card (ART59). Then cut out the tree.
Paste some glue at the top end of the card and start placing buttons – these will take a while to dry. Start at the top of the tree and work your way down.
If using the ribbon (or other extras) then, cut to size and add as trimming at the bottom of the tree or on top of the buttons from side to side.
In the above picture I've added snowballs as baubles on one tree and the tree topper on the other tree.
Makes great bunting or stick on to a folded piece of card to make Christmas Card. 😊

Have fun!
